

HIP ACCESSORY KIT

PRODUCT: HIP ACCESSORY KIT

PRODUCT CODE: EASYRIDGE/HIPKIT (with Black Clips)
EASYRIDGE/HIPKITERRA (with Terracotta Clips)

PURPOSE: Hip Accessory Kit to be used in conjunction with Easy-Trim Standard Ridge Kits and Easy-Trim Ridge Plus Kits. Ridge and hip tiles run across the peak of the roof providing the perfect clean finish to a roof, so it is important that they are installed securely. The dry hip and ridge system simply involves fixing ridge tiles to a roof without sand or cement mortar, but instead with screws and ratchet clips, which fix each ridge tiles to the roof. Our Hip Kits contain everything you need to fit a 6m hip.

INSTALLATION: See Hip Kit Installation Guide

HIP KIT CONTENTS:

HIP TRAYS

Hip Trays support hip tiles along the hip line of the roof without the need for mortar. Fitted above the ridge roll, they provide an even, level run to the hip of a roof. The result is a discrete neat continuous line on the roof tile which does not detract from the aesthetics of the roof. Our hip trays are 1.2m in length by 250mm wide. Fitted above the Ridge Roll, they are designed to provide an even, level run to the hip of a roof.

See Hip Tray Datasheet

HIP CLIP PACK

The Hip Clip has been designed to secure the cut single lap on the hip tiles. Pack contains:

- 20 x Large cut tile clips
- 20 x Small cut tile clips

See Hip Clip Datasheet

RATCHET CLIPS

Our flat profile Ratchet Clips provide a subtle aesthetic finish and incorporate extensive ratchet teeth for a rapid and accurate installation.
